

vision

To provide innovative and reliable solutions where quality and service must exceed the demands of the Construction Industry.

mission

To design and construct to a budget responding to the needs of our clients and the needs of our environment.

objectives

- To enable potential clients to redirect their needs and requirements back to the system, by assisting them to understand their objectives and then striving to achieve the same.
- To perform specialized tasks such as designing, drafting, estimating and providing all services under one roof.
- To anticipate the needs of clients thereby establishing better service and quality through better management.
- To maintain a collaborative approach with our clients and achieve better value by improved design and construction.
- To observe the highest standards of integrity at all times, maintaining code of ethics and conduct policy through our mission statement.

Austpeak is a wholly WA owned company which believes in a "hands on" approach by establishing involvement in all areas.

With our highly focussed in-house team of qualified architects, designers, draftsmen, specialized estimators and structural engineers, we have the expertise and the control to design and construct buildings to any size and design criteria.

Every project that is conceptualized by us, stays with us due to our competitive price structures, problem-solving skills and guaranteed completion schedules.

With the ability to design and estimate projects in-house, Austpeak is able to render customized and cost-effective service to most clients big or small, tackling projects from 500 square meters to 15,000 square meters.

These advantages are further enhanced due to the support of our own fabrication plant and earth works department; quality and cost factors are kept in control while time delays are eliminated.

To complete the package, **Austpeak Commercial** can assist with acquiring vacant commercial land, marketing off the plan and/or on completion, and seeking suitable tenants for your vacant property.

We can also establish Strata Companies up to and including the Inaugural Annual General Meeting with the Licensee.

In a nutshell, Austpeak provides a complete turnkey project and one-stop service from acquisition of land, design conception to building and possession.

Excellence in Customer Service is always our priority.

philosophy

Austpeak's approach to business is a unique hands-on involvement with our clientele, enabling us to relay even the smallest details or queries on the spot.

We believe that **what** we do is just as important as **how** we do it. This makes it easy to understand the pressure we place on ourselves to complete projects on time and within budgets allotted to us - **first time, every time.**

It is this dedication to customer satisfaction that has enabled us to climb up the commercial building ladder within the Top Twenty companies, **providing our clients with total peace of mind when dealing with us.**

strengths

- In depth commercial and industrial building industry background flowing from the experience of Austpeak's personal resource base.
- Guaranteed competitive pricing in conformity with client's specifications and budget.
- Creating plans that include efficient planning and logistics.
- Attractive and appealing designs and aesthetics that provide the client with more for their budget.
- Ability to perform specialized projects and complete them on schedule.
- Ability to provide a solution for every problem where other companies might fail.
- Proven safety record and attention to safety education.

At Austpeak, work-flow between all departments is smoothly dove-tailed so that design and quotes are done in record time; 3 dimensional hard copies are provided (at extra cost) after final approval by clients to enable them to select colors and make changes (subject to councils' approvals).

Once the building project commences, our on-site building supervisors and project managers supervise every project, maintaining a close watch on time schedules and establishing total control from start to finish.

Communication is sustained at all times with our clients and key personnel by maintaining a tight working relationship and being actively involved in all dimensions of the job, right from concept to completion.

Even after hand-over, our supervisors, engineers and sales team follow up regularly to tackle issues if any, that may eventuate after possession ...***because, we at Austpeak, believe that Extra-ordinary Quality and Service is our Standard***
